My Practice – Opioids Query Build

To build a query for Opioids Prescribing in My Practice please follow the below steps -

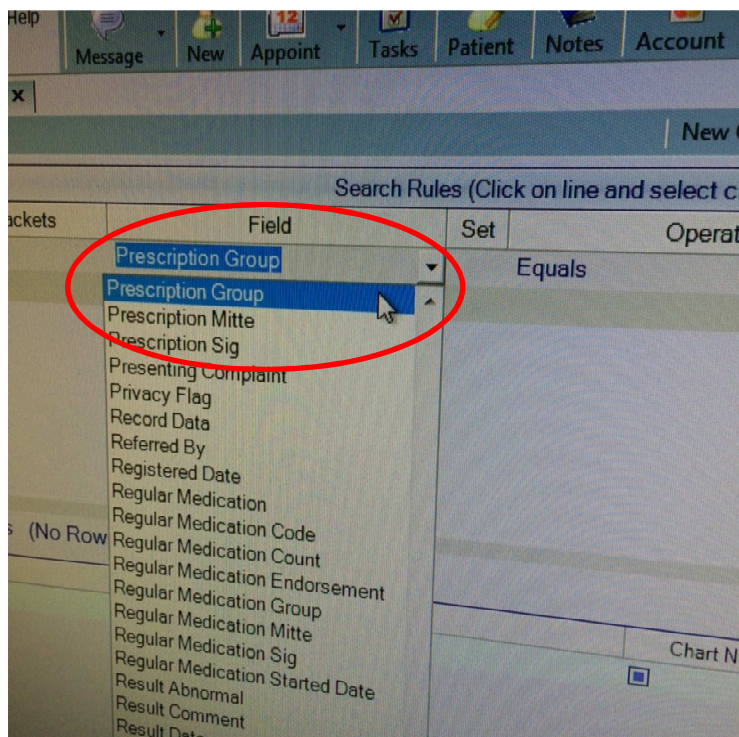

- Click on “Query” link as shown in picture 1
- In Field click on “Prescription Group” or “Prescription” from drop down menu as shown in picture 2
- In Operator click on “Contains” as shown in picture 3
- In Value type in the drug name e.g. paracode, tramadol etc. (If you select prescription group in Field then select “Narcotic Analgesic”) For the prescription date type in “>” in “Operator” and in “Value” type in first day of the month you are doing audit for. All as show in picture 4
- You will need to follow this process for each individual drug

NB: As per Cornerstone practices should have a controlled drug register for all controlled drugs
