

# How to search for patients dispensed opioids in RxOne:

Go to 'Drug Usage' to create a 'Patient Drug Usage Report'.

The screenshot shows the RxOne Patient Drug Usage Report window. A blue arrow points to the 'Date Dispensed' section, specifically the 'Start Date' and 'End Date' fields, with the text 'Select start and end dates' overlaid. The 'Start Date' is set to '18 Aug 2017' and the 'End Date' is set to '18 Sep 2017'. The window also displays various filters and options for generating the report, including 'Person Details', 'Stock Criteria', and 'Doctor Criteria'. The 'Script Details' tab is active, showing fields for 'Script Number', 'Start Number', 'End Number', 'Product Group', 'Product Class', and 'Stock Type'. The 'Sort By' dropdown is set to 'Script Number'. The window title is 'Patient Drug Usage Report' and the status bar indicates 'Patient Drug Usage Report Ver:3017.8.10.4 Viewing Main Database User:MARIE Status'.

This screenshot shows the same RxOne Patient Drug Usage Report window, but with the 'Start Date' field highlighted in yellow. The 'End Date' remains '18 Sep 2017'. The 'Script Details' tab is still active, and the 'Sort By' dropdown is set to 'Script Number'. The window title is 'Patient Drug Usage Report' and the status bar indicates 'Patient Drug Usage Report Ver:3017.8.10.4 Viewing Main Database User:MARIE Status'.

Select 'Opioid analgesics'

A report will be generated like this:

All prescriptions for opioid analgesics will appear (including combination products). We are only looking at first dispensings, not repeats. Then randomly select 10 patients who have been prescribed opioids (or opioid combination products) during that month.

Patent Drug Usage Report For For All Scripts/For All Scripts/Therapeutic Group Of Opioid Analgesics/MS Classification Of 'Prescription'/Date Dispensed Between 18 Aug 2017 00:00:00 And 18 Sep 2017 23:59:59

Script Number	Drug Dispensed	ExpandedSig	Date Dispensed	Person Name	Person Address	Dr. Name	Dr. Address
16179479	TRAMADOL HCL 50MG C (ARW)	Take ONE to TWO capsules THREE times daily if required. ***MAY CAUSE DROWSINESS*** Maximum of 400mg per day between tramadol products	23/Aug/2017

After you have selected the 10, go into their files, and check the 'Events audit' section (or where you usually record interventions) to see if an intervention was documented. In the Events Audit section you can record face-to-face or phoned conversations, or insert comments.

During the course of this programme, if any interventions are made it is good practice to document them here so everyone can see what has happened. If you have another method of reliably documenting interventions, you can use this, so long as everyone in the pharmacy knows where to document and look for interventions.
