

Appendix 3: Search for patients dispensed SSRIs in RxOne

Go to 'Drug Usage' to create a Patient Drug Usage Report.

The screenshot shows the RxOne Patient Drug Usage Report window. A blue arrow points to the 'Date Dispensed' and 'Date Discontinued' fields, with the text 'Select start and end dates' overlaid. The window includes tabs for 'Script Details', 'Extra Script Criteria', 'Person Criteria', 'Stock Criteria', and 'Doctor Criteria'. The 'Script Details' tab is active, showing fields for 'Date Dispensed', 'Date Discontinued', 'Start Date', 'End Date', 'Script Number', 'Stockcard Options', 'Product Group', 'Product Class', and 'Stock Type'. The 'Person Criteria' tab is also visible, showing 'All Patients' and 'Selected Patients' options. The 'Stock Criteria' tab shows 'Stock Location' and 'Compound/Pro' options. The 'Doctor Criteria' tab shows 'Additional Fields To Show' and 'Show Script Comment' options. The window also includes a 'Sort By' dropdown menu with options: 'Script Number', 'Person Name', 'Doctor Name', 'Date Dispensed', and 'Drug'. The bottom of the window shows the 'Patient Drug Usage Report' title bar and a status bar with 'All Sales For Living Rewards for 17 09 17 successfully sent.' and 'Last Backup to DB Master C Drive: 17 Sep 17 9 PM'.

This screenshot is similar to the one above, showing the RxOne Patient Drug Usage Report window. In this view, the 'Date Dispensed' and 'Date Discontinued' fields are highlighted in yellow. The 'Date Dispensed' field is set to '18 Aug 2017' and the 'Date Discontinued' field is set to '18 Sep 2017'. The rest of the window, including the tabs and the bottom status bar, is identical to the previous screenshot.

Select what you would like to export

Then check the prescriptions only include SSRIs so you can find 10 relevant patients to randomise for audit.

Interventions can be recorded in the 'Events Audit' section where you can record face-to-face or phoned conversations, or insert comments.
