ID : TLS10

Callouts:
- Ensure accurate date (points to date range)
- Ensure correct DHB (points to 'ADHB')

Counties Manukau District Health Board

The screenshot shows the MedTech-32 Query Builder interface. The query is named "Discharge summary". The "Where" clause contains three conditions:

Column	Condition
Patient - Enrolment Status Code	Equal to Confirmed Enrolment (C)
In Box - Date Received	Between Mon 17 Feb 2014 00:00:00 and Wed 02 Apr '09
In Box - Subject	Equal to CMDHB

Annotations with arrows point to the date range and the DHB code:

- "Ensure accurate date" points to the date range: "Between Mon 17 Feb 2014 00:00:00 and Wed 02 Apr '09".
- "Ensure correct DHB" points to the condition: "Equal to CMDHB".

The "Select" clause lists the following fields:

- Patient - NHI No
- In Box - Date Received
- In Box - Subject
- In Box - Provider Code
- In Box - Audit - Date/Time - First Added

Buttons on the right include: Query Store, Run Query, Run SMS Query, and View SQL. The status bar at the bottom shows "ID : TLS10" and "Close Help" buttons.
